Hygiene & Care

Personal Protective Equipment

Our PPE or the Personal Protective Equipment is designed to shield and protect the wearer against various contagious viruses, bacteria's, or infections. These Personal Protective Equipment's (PPEs) are nothing but a protective gear designed to safeguard the wearer's health by minimizing any exposure to hazardous biological agents such as viruses, infections, body fluids etc.

The Protective equipment consists of garments and other essentials, it is worn mostly by health care workers, people taking care of infected people or any other persons in need to protect themselves against infectious agents.
